RE: Manager's Report

Board Meeting: February 3rd, 2026

### **Roads**

Our Heavy Duty trailer for equipment transport has all eight tires replaced, this month we will be replacing all the rotten wood platform. The district purchased a John Deere backhoe. The district has been subcontracting Twisselman grader operators twice thus far and will continue to do so in order to train and aid in fixing our roads; two of our employees will be training with them.

### **SWCD**

MACK trash truck has been in and out of repair shop in Bakersfield, it is a fairly new truck and would not pass a DOT inspection, will continue to repair and maintain as needed. Working with Integrated Waste Management Authority (IWMA) for possible solutions on providing new trash bins to all residents, possible workaround to use old trash truck again.

### **Finances**

Account balances have been included in the consent agenda.

### **Meetings**

### **Other**

The district has severed ties with one employee late last month, and this month hired a new resident in the valley with a valid class A Commercial Drivers License with years of experience in the trucking industry.

Humberto Renteria  
Interim General Manager CVCS
